

The Student Association in the next two weeks is sponsoring a number of seminars in conjunction with various members of the faculty on the Plattsburgh State Campus. It is the hope of the Student Association that in sponsoring these seminars, an atmosphere of collective learning could be created, so as to set a precedent for the future at this institution. We hope that as a result of these seminars and the atmosphere that has been generated on the Plattsburgh State Campus the last week and a half, the students and faculty will be given the chance to confer and thus create a new mold of learning that will stretch far and beyond the structured class room experience.
